payarc

Still paying processing fees?

Introducing PAYARC's No Cost Pricing

Are you ready to save on your processing cost?

· Collect 100% of your revenue

· Eliminate monthly processing fees

· Incentivize cash payments

· Robust back office portal

· Next day funding

How It Works?

When the customer is ready to pay, and enters their card into the terminal.

They will then be prompted to confirm the amount with the discount applied.

$100 sale

The transaction will go through on the terminal charging the customer a 4% fee on their transaction.

$100 x 4% = $4
$100 + $4 = $104

The 4% will cover the merchant's credit card processing fees, practically eliminating the credit card processing fees.

$104 x .03846% = $~4

Merchant's Rate
